## ENVIS Outreach Program at Kolhapur on 27 March,2016

### ENVIS Outreach Program at Kolhapur on 27 March,2016

As a part of ENVIS outreach program, NSWAI ENVIS team comprising of Mrs. Manisha Date (Program Officer) and Mr. Monish Deshmukh (Information Officer) travelled to Kolhapur on 27th March 2016 to conduct a seminar on challenges of Municipal Waste Management and how these challenges need to be tackled before they loom into being a big problem. Kolhapur being mostly an agriculturally dominated province, the management strategies revolved around composting, bio gas and recycling plants.

The seminar was conducted for an in house team of Zilla Sahakari Duh Utpadak Sangh Ltd, commonly known as Gokul. The attendees 40 in number were mainly the collectors and distributors of Gokul; and had agricultural background. Mostly based in the rural regions but travelling to various cities often they were informed with the difference between a village Pachayat and a municipal corporation in terms of waste generation and management pathways.

The seminar lasted for one and half hours and was very well received as the audience keenly absorbed the information given to them regarding the social and economical implications of having efficient waste management systems. Attendees were especially interested in knowing various waste management techniques for agricultural and village waste. Many also, showed interest in getting NSWAI-ENVIS's consultation for the same. The optimism shown by the attendees was reassuring.
